SUMMARY

Front-end Developer with 8 years of experience building modern web applications using Angular. Focused on delivering seamless user experiences and leveraging AI technologies to build intelligent, scalable, and impactful digital products. Dedicated to writing clean, maintainable code and continuously learning and adopting new technologies to solve real-world problems.

WORK EXPERIENCE

Front-end Developer

Eviden | Taguig City (Nov 2023 - Present)

Projects: Distributor Website, Customer Website, Public Website

- Contributed to the development and maintenance of multiple web platforms, including customer-facing insurance websites across Indonesia, Vietnam, and the Philippines, a public website, and a Global High Net Worth Distributor platform, ensuring consistent, responsive, and high-quality user experiences across devices and browsers.
- Built and enhanced features across these platforms, including Angular component upgrades to improve performance, stability, and maintainability, and supported the implementation of web analytics to deliver actionable insights for business teams.

Front-end Developer

i-Cube Digital Solutions | Makati City (Nov 2021 - Oct 2023)

Projects: Sample Control System - Norway

- Contributed as a key member of the development team for a specialized web application for a mining company, delivering new features and enhancing overall functionality and user experience.
- Upgraded the mapping feature from ng-maps to Mapbox and developed a reporting module with dynamic, interactive visualizations using D3.js to enable data-driven insights.

Front-end Developer

White Cloak Technologies | Pasig City (Sep 2020 - Nov 2021)

Projects: Ayala Brands (Website)

- Worked on real estate web applications using Next.js, React.js, and GraphQL, contributing to new feature development, issue resolution, and performance optimization

Junior Web Developer

FFUF Manila | Makati City (Sep 2017 - Jun 2020)

Projects: Daimler Newsletter, Brandschutz Fire Documentation, Stihl App

- Contributed to the development and maintenance of multiple web applications, including a newsletter template system, fire protection documentation tool, and multilingual article publishing platform, delivering features, improving usability, and ensuring consistent performance and cross-client compatibility.
